Østnes Helicopters was founded by my father in 1993, and 30 years later also include the third generation in the business.

After more than 30 years supporting Airbus Helicopters, continuously expanding our services, acting as distributor for Airbus Helicopters in the Nordic market, we see the result of our teamwork. Our team has created a significant presence in the Nordics within the Rotary Wing Sector and has sold more than 400 helicopters, both directly from Airbus Helicopters and through the secondhand market.

Additionally, in 2020, we launched our own Airbus approved Maintenance Center at Eggemoen Airport, close to Oslo. This has provided us with a chance to further grow our ambitions of becoming a One Stop Shop for Nordic helicopter Operators, as well as continuing to deliver high-quality after sales services to all of our customers worldwide.

We support our clients in their fleet renewal projects, and market their used helicopters and fleets on exclusive basis only.

We will take care of and support you through the entire process until the helicopters are delivered to you.

Frode Østnes
CEO

SALES OVERVIEW

Type	YoM	Delivery slot
H125	2025	Q1 2025
H125	2025	
H125	2025	
H125	2025	Q2 2025

H125	2025	

Please note that the delivery slots are indicative and may be subject to change.

Discover the New Airbus H125 - Available from April 2025

In 2025, we are proud to offer brand-new Airbus H125s, with deliveries starting in April. These aircraft are fully equipped for utility and aerial work, with options for minor customizations to suit your specific operational needs. Additionally, we provide the opportunity to paint the aircraft in your preferred color scheme.

As the Nordic distributor for Airbus Helicopters, Østnes Helicopters offers these new helicopters for sale across the Nordic market. Leasing options and tailored financial solutions are also available, both in the Nordics and for clients in Europe and North America, through Dragonfly Helicopters.

Explore the available aircraft on the following pages. For more information or to make a purchase inquiry, contact our sales team at helicopter@ostnes.com.

Blue skies!

- Team Østnes & Dragonfly

ENGINE

- Safran Arriel 2D

SHOPPING LIST AT EGGEMOEN

PAINT

Through Heli Paint, we provide our customers with customized paint schemes for their new H125 helicopters. Eggemoen Heli Paint AS, established in 2022, is a key collaboration within the Eggemoen Aviation & Technology Park between Østnes Helicopters Group and Tronrud Engineering AS.

Our highly skilled team of painters delivers a wide range of services, from precision painting of new and pre-owned helicopters to specialized industrial painting solutions. Over the years, Heli Paint has successfully completed paintwork for 11 new H125s, setting a standard of excellence for our clients.

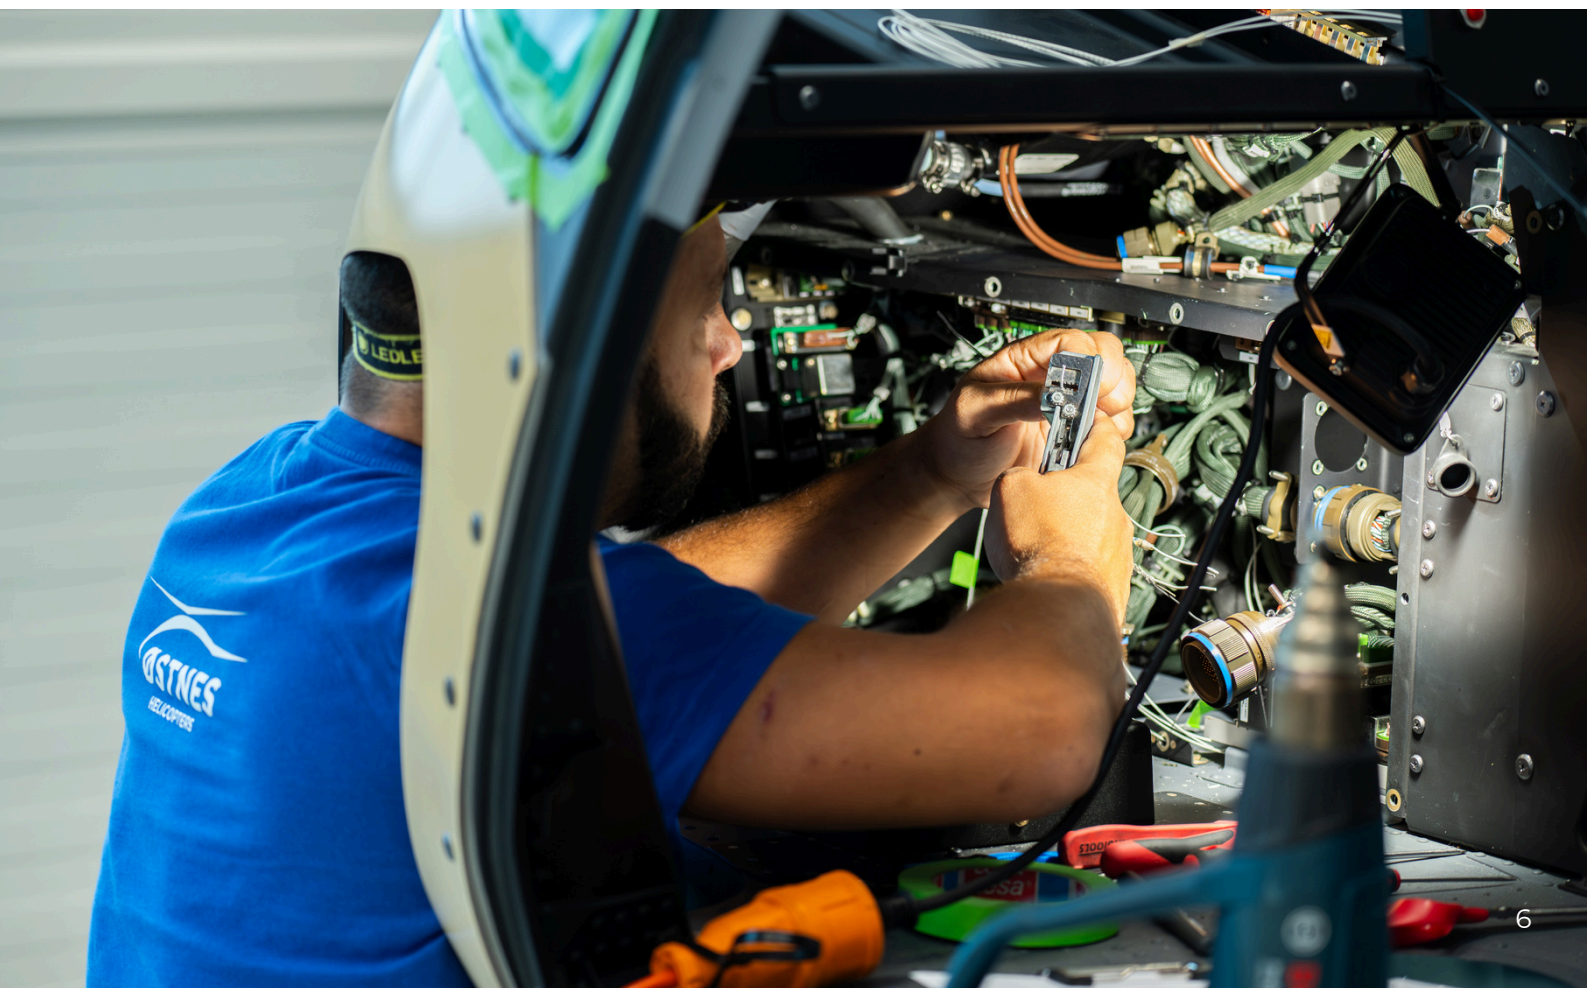

To ensure availability in our schedule, we encourage customers to book early. For more advanced paint schemes, early clarification is essential to allow sufficient time for planning and execution.

AVIONICS & MISSION EQUIPMENT

Our Airbus approved maintenance center and certified Part 145 organization offer comprehensive maintenance and modification services. Whether minor adjustments or extensive customizations, our skilled team ensures that your new helicopter is perfectly tailored to your needs. These modifications are carried out in close collaboration with our CAMO team, guaranteeing seamless integration and compliance.

Below is a list of available installation options. Additional installations may be available upon request.

- Headset David Clark 40411G-02
- Technisonic TFM138 FM Radio
- Nat NPX FM Radio NPX138N-000-00 and NPX-IKC
- Garmin GRA55 Rad. Alt
- Donaldson IBF filter / PF15941444
- DART PA100 PUREAIR System
- DART BearPaws
- Swiss Helicopter Engineer Ipad Holder
- DART full length Wearplate
